

EyeScreen Photographic Examination

Patient Name (please print): _____

We are pleased to provide our patients with an advanced digital retinal exam called EyeScreen. It is fast and easy. It can usually be performed without dilating drops, although dilation may be performed for other purposes.

EyeScreen provides:

- High resolution screening image of your retina
- An in depth view of the retinal surface including optic nerves and blood vessels
- Images to be used for future comparison to identify changes or problems early, even if no symptoms are occurring

The EyeScreen Exam is not included in insurance coverage and is an addition to your comprehensive eye exam charges. The fee for the EyeScreen Exam is **\$39.00 and includes a copy of the image for you to keep.**

Please select one of the following boxes:

I AGREE TO have my retinal health evaluated with the EyeScreen Exam today. I understand that the fee is \$39.00 for this screening not covered by insurance.

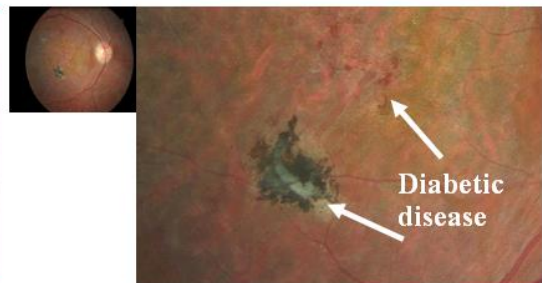

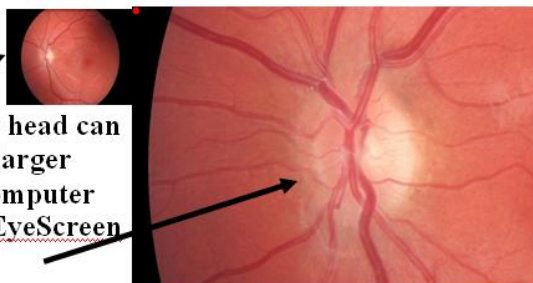

I DO NOT wish to have the Retinal Photographic Exam

Actual
Size

This Nerve head can be viewed larger than the computer screen w/ EyeScreen

Note for Patients with Known Pathology: If you have pathology that warrants even more in-depth imaging, we also have Fundus Autofluorescence imaging and analysis technology available at our office. The doctor will help you know if this in-depth type of testing is recommended for you. Medical insurance can often be billed for this detailed imaging that involves more specific views and filters for deeper analysis of the pathology. **If more in-depth imaging is warranted, the charge of \$89.00 can often be billed to medical insurance. However, the EyeScreen examination charge of \$39.00 is not billable to insurance.**
